

## Installation manual for SILVA SEC and SEC X sales samples 2015-09-08

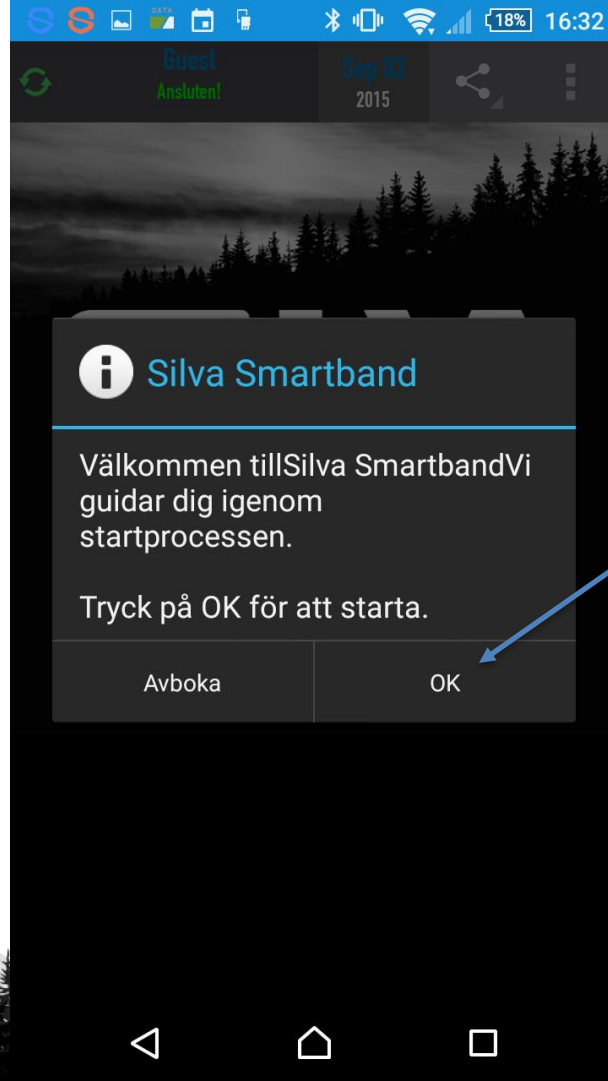

### **Introduction:**

Different Android versions and different mobile phone models requires slightly different routines when downloading, installing, synchronizing etc. Therefore, the procedures might differ slightly compared to this manual. Please also note that this is a Beta-version and not the final App. Once released in early 2016, the app will be downloaded from App-store or Google play.

In the last pages of this manual you will find a segment, Problems and solutions, which might help if you run into any problem.

## Installation

1. Go to Security in Settings in you phone. Enable installation of apps from unknown sources (this will not be required when the app is published on Google play or App store).
2. Turn off wifi in your phone.
3. Make sure that there are no other SEC or SEC X nearby (within ~30m) which are trying to SYNC to a phone.
4. Download the App from the link, then install it.
5. Start the APP

 **Silva Smartband**

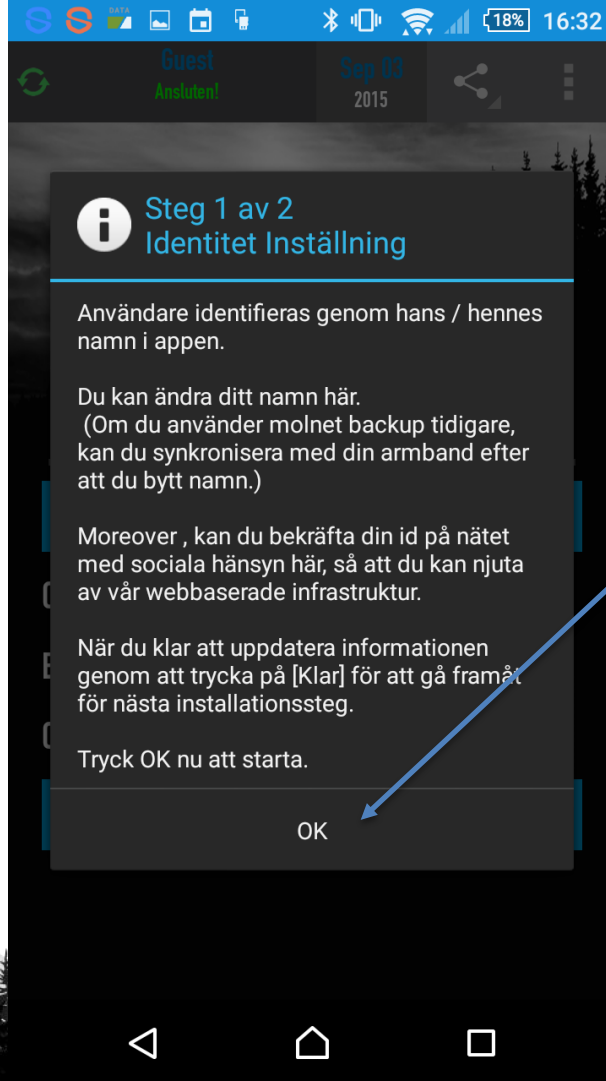

Välkommen tillSilva SmartbandVi guidar dig igenom startprocessen.

Tryck på OK för att starta.

Press return on your phone

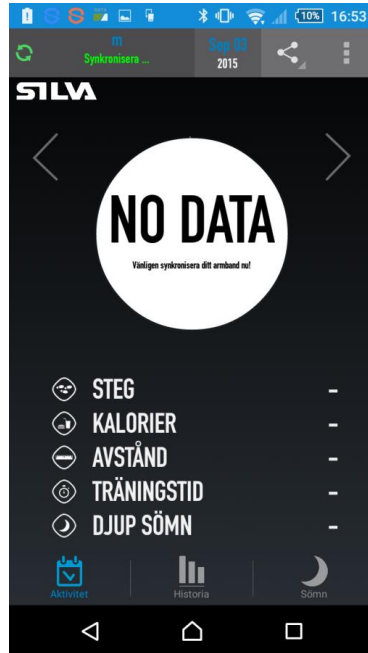

Press and hold the top button on SEC to deactivate transport mode

Press and hold the top button again on your SEC again until it says SYNC

Green means that it the phone and the smart band is connected

...start walking

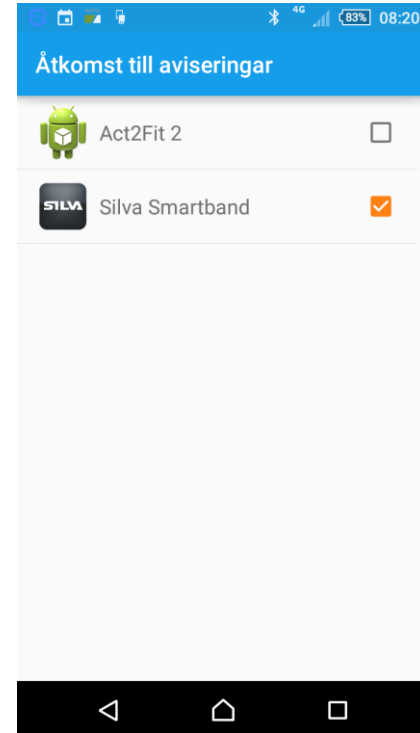

## Problems and solutions:

If this page is displayed more than 3 minutes during/after the installation, please shut off the app and re-start it.

## Problems and solutions

If this page is displayed during/after the installation (access to notifications), please select Silva Smartband and then leave this installation.

If this box is displayed repeatedly (Silva Smartband has been stopped), uninstall the app and reinstall it again starting from point 1 in this manual.
